Bay Window Roof - Aged

Traditional Copper Sweep awning with Battens and Scallops

Bay Windows...

In the past, one had to find a qualified artisan and have him come to your location to fabricate your bay window roof on the spot. Not any more! Our bay window roofs are custom built one a time to your specifications and delivered to you ready for installation by semi-skilled workers. We've accomplished this through our unique unitary design method. Our bay window roof comes to you in one piece, built on its own base, and ready to simply set atop and fasten to the existing bay window structure. No need to pay a master carpenter to frame out and deck.. Simply finish your bay window with a flat top, then set our bay window roof unit on, fasten it down, and flash it to the wall.
